# ABOUT JOCAM

The birth of JOCAM was in response to the need for a bigger organisation that can adopt, harness, and advance the overwhelming engineering, construction, procurement, logistics and manpower support successes already attained by its mother company, POS ASSOCIATES - which came into existence in 1994. Simply put, JOCAM is a bigger, stronger and an improved replacement for POS ASSOCIATES.

The establishment of JOCAM NIGERIA LIMITED was in response to the need for a strong and capable organization that can adopt, harness, and advance, the Engineering, Procurement, Construction and Installation as well as logistics and manpower support services.

JOCAM is a business organization, incorporated in the Federal Republic of Nigeria as an indigenous, private, limited liability company that undertakes the provision of the above services.

JOCAM tailors her activities to suit particularly, the necessities of the Energy (Oil and Gas), Manufacturing, Power, Service and allied sectors of the Nigerian economy. In doing this, we always foresee JOCAM NIGERIA LIMITED with optimism, as a leading Nigerian company in our chosen line of services.

JOCAM maintains a qualitative and productive workforce, proportionate to the limits of our engineering involvement which include engineers, specialist professionals, managers, technologists, technicians and consultants.

Since its establishment, JOCAM Nigeria Limited has successfully performed numerous Projects and Contracts of varying complexity and magnitude for many of her clients in Nigeria. In JOCAM, we strive to ensure Plants and Project's uptime without compromising quality, safety, environmental friendliness and sustainability, and genuine public interest.

## OUR PARTNERS

### Alpha Laval

---

Alfa Laval is a leading global provider of first-rate products in the areas of heat transfer, separation and fluid handling. With these as its base, Alfa Laval aims to help enhance the productivity and competitiveness of its customers in various industries throughout the world. We define their challenges and deliver sustainable products and solutions that meet their requirements – mainly in energy, the environment, food and the marine industry.
